

AMENDMENT

Kindly cancel Claim 2, without prejudice or disclaimer thereof.

Kindly amend the claims to read as follows:

1. A patch bag comprising a heat-shrinkable patch adhered to a heat-shrinkable bag, the heat-shrinkable patch comprising a first heat-shrinkable film and the heat-shrinkable bag comprising a second heat-shrinkable film, the first heat-shrinkable film comprising a blend of:

B) A) ethylene/alpha-olefin copolymer having a density greater than about 0.915 g/cm^3 , present in an amount of at least about 5 percent based on a total weight of the blend; and

B) heterogeneous ethylene/alpha-olefin copolymer having a density of less than about 0.915 g/cm^3 , present in an amount of at least about 21 percent, based on the total weight of the blend; and

wherein the ethylene/alpha-olefin copolymer having a density greater than about 0.915 g/cm^3 and heterogeneous ethylene/alpha-olefin copolymer having a density of less than about 0.915 g/cm^3 together make up at least 70 percent of the total weight of the first film, and wherein the patch is adhered to the bag with an adhesive or corona treatment.

3. The patch bag according to Claim 1, wherein the ethylene/alpha-olefin copolymer having a density greater than about 0.915 g/cm^3 is present in the blend in an amount of from about 5 to 95 percent, based on the weight of the blend, and the heterogeneous ethylene/alpha-olefin copolymer having a density of less than about 0.915 g/cm^3 is present in the blend in an amount of from about 30 to 95 percent, based on the weight of the blend, and wherein the ethylene/alpha-olefin copolymer having a density greater than about 0.915 g/cm^3 and the heterogeneous
